

ATTENTION
ALL BCN RESIDENTS

Bigstone Cree Nation and **ATCO Electric** are collaborating on a Wildfire Mitigation Project.

Be advised that there will be heavy equipment along the main power lines including the lines into residential yards.

The objective of this project is to reduce power outages caused by falling trees and mitigate damage from wildfires to the electrical infrastructure.

ATCO has engaged the services of Bigstone Oilfield Services & Supplies (B.O.S.S.) and Bigstone Forestry Inc. (BFI) in order to carry out this scope of work.
