

DASH FOR DIALYSIS RELAY RUN 2025

This race is a total of 117km. Going through 3 different communities. One team can be made up of 12 people running different distances.

1 in 10 people are diagnosed with kidney disease. Community members receiving dialysis are required to travel to Slave Lake or Edmonton 3 times a week. Leaving little to no personal time for these community members.

Our goals are to raise awareness, provide education, provide early kidney screening, to bring people together and raise funds for an in community dialysis program.

Along with hosting this relay race, we will have a 1km honor walk, BBQ, entertainment, door prizes, speakers, and more.

TOGETHER WE ARE STRONGER THEN KIDNEY DISEASE!
